(a) Task structure: displacement vs reinstatement
automation frontier I_t
new-task bound N_t
labor tasks n_t^{lab}
task index
period t
(b) Labor share s_t
labor share $s_t = L^D/L^S$
absorbing value 0.05
share
period t
(c) Demand: consumption vs floor (outcome = smooth)
aggregate consumption C_t
consumption floor $C^{min} = 0.30$
consumption
period t
(d) Aggregate: output growth (price effect)
total output GDP_t
output
period t
